KUWAIT, Dec 3: The Parliamentary Finance and Economic Affairs Committee decided Saturday to put its report on 'regulations for contracting with private companies to develop northern oilfields' on the agenda of the National Assembly.

Head of the committee MP Yousef Zalzalaha told reporters the committee decided not to

exclude its report from the agenda and to give the parliament the choice to approve it or to return it to the committee.

Some of the committee members had requested withdrawal of the report, which was prepared last August to propose legislation for developing northern oilfields, Project Kuwait.

Al-Zalzalaha said after listening to different informed viewpoints, the committee completed a proposal to amend some sections of law 45/1960, related to export companies.

The committee formed a team to finalize the

amendments to be approved next week.
